"I can set-up in 15 seconds and be ready for my client"

The UP100 Pro Case Features

Most rolling cases feature a detachable dolly with a single axle and single wheels. The strongest part of your case has to be the handle, the wheels and axle assembly. Our handles are forged metal with precision workmanship that allows you to hand carry your case with confidence if you choose not to use the detachable roller dolly.

The detachable roller dolly's double wheel design reinforces and balances the load to assure perfect navigation.

UP100 Pro Case Dimensions
