

# Blushes

## ULTIMATE DRY BLUSH

Cinema Secrets' Ultimate Dry Blush is a rich combination of micro-pulverized mineral based color pigments combined with the finest quality base ingredients.

The brush on "velvety" feel will assure even coverage and disappearing blends, that leave the blush lasting forever.

Color based values give you a wide selection based on skintones and undertones. These highly pigmented blush colors wear all day, will not run or be effected by perspiration or moisture.

Ultimate Powder Blush comes in a UV clear capped compact container and should deliver between 150 and 200 applications.

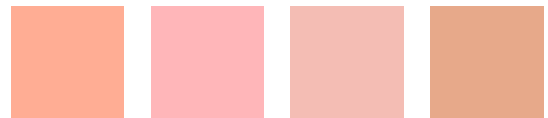

## ULTIMATE CREME BLUSH

Cinema Secrets Creme Blush is also a combination of rich mineral based pigments formulated in a base tone related base perfect for mixing into Cinema Secrets Ultimate Coverage Foundations. Using Cinema Secrets Cream Blush assures extra-long lasting application.

Color variations can be acheived by mixing with the foundation or by direct application on the skin.

Creanm Blush should deliver 200 to 250 applications. Available in a .25 oz. clear container.
